## Energy-Saving Lighting

Eco-friendly news

### MULTI-USEFUL

Touted as "two lamps in one," the Energy Star-approved Berkeley II lamp from Full Spectrum Solutions provides dimmable fluorescent task and ambient lighting. Its two CFL bulbs can be used independently or together for upward, downward or combined illumination. The Contemporary steel design has a 120-volt power supply outlet on its base, useful for plugging in a laptop computer or recharging a cell phone. Multiple lampshade options are available, including crepe and raspberry, shown above; bulbs included.
