The Re-Emerging Feminine

Ultimate Lighting Experience

FULL SPECTRUM SOLUTIONS introduces its BlueMax 70 Watt Desk Lamps. The high definition bulb is as bright as a 300 watt halogen and lasts as much as 10 times longer than standard bulbs. The BlueMax's unique 6 phosphor blend produces a bright lighting environment (with no harmful UV rays) where details can be seen more clearly and colors more accurately. This is so beneficial for doing general tasks like reading, studying, writing, art work, sewing and more. The adjustable neck feature can adjust the light exactly where it is needed and is fully dimmable from 100% to 20% for flicker-free maximum comfort. This energy efficient model uses 75% less electricity than standard lamps. Our tester praised the lighting device and stated that his productivity increased since he was able to work early in the morning and late at night because of the improvement of the lighting. He was able to adjust the light brightness making it just right for the comfort of his eyes.
